AZIMXON ERGASHEV

Python Backend Developer

PROFESSIONAL SUMMARY

Driven and detail-oriented Python Backend Developer with hands-on experience designing reliable server-side architectures, RESTful APIs, relational databases, and automated Telegram bots. Committed to building scalable solutions using clean code principles, robust error handling, and high-performance database querying.

TECHNICAL SKILLS

Languages:	Python (Core, OOP, Data Structures & Algorithms)
Backend Frameworks:	Django, Django REST Framework (DRF), Aiogram 3 (Telegram Bot API)
Databases & ORM:	PostgreSQL, SQLite, Django ORM, SQL Query Optimization
API & Architecture:	RESTful APIs, JSON, Authentication (Token/JWT), Webhooks, MVC/MVT
Tools & Versioning:	Git, GitHub (Clean branching & commits), Linux CLI basics, Postman

FEATURED PROJECTS

Auto Sklad — Warehouse & Auto Parts Management System | Lead Backend Developer 2024

Technologies: Python, Django, Django REST Framework, PostgreSQL, Aiogram 3

- Engineered a centralized backend system to catalog, filter, and track thousands of automotive spare parts with real-time inventory management.
- Developed high-throughput RESTful endpoints using Django REST Framework for category classification, SKU searches, and stock operations.
- Implemented interactive Telegram Bot integration (@avtoozapchast_bot) utilizing Aiogram 3 for instant customer inquiries, catalog browsing, and notification workflows.
- Structured normalized relational database schemas in PostgreSQL with indexes to ensure fast search retrieval times and ACID transaction safety.

EDUCATION & TRAINING

University — Undergraduate Degree Present

- Higher education curriculum focused on computer science fundamentals, analytical problem-solving, and software principles.

Mohirdev Praktikum — Intensive Python Backend & Web Development 2024 - Present

- Practical mastery of Django, DRF, database design, API security, and production deployment standards.

Sariq Dev Python — Core Python & Algorithms 2023 - Present

- Deep dive into Python syntax, object-oriented programming (OOP), algorithmic thinking, and clean code hygiene.

LANGUAGES

Uzbek:	Native
English:	Technical proficiency (Documentation, code review & development)
Russian:	Working proficiency
